

The Salon Spot

Request for Proposal (RFP)

Scope of Work for Mobile & Web Application Development

Project Overview

About The Salon Spot

The Salon Spot is a technology marketplace that connects salon owners with licensed beauty professionals seeking flexible, short-term workspace rentals. Similar to Airbnb for beauty professionals, the platform allows salon owners to monetize unused salon stations, suites, and treatment rooms by offering daily or short-term rentals, while beauty professionals can easily search, book, and pay for workspace on demand.

The initial launch will focus on the Southern California market, with plans to expand throughout California and eventually nationwide.

Our mission is simple:

“Create your listing in under 5 minutes. Start earning immediately.”

Project Objective

The Salon Spot is seeking an experienced software development partner to design, develop, test, deploy, and support a scalable marketplace platform consisting of:

- Native iOS application
- Native Android application
- Responsive web application
- Web-based administrative portal
- Cloud-hosted backend infrastructure

The selected vendor should provide recommendations for technology architecture while delivering a modern, intuitive and scalable solution that supports future growth.

The selected vendor will be responsible for delivering a fully functional, production-ready marketplace platform, including all software, documentation, deployment, and support services necessary for a successful launch.

Scope of Work

The development partner will be responsible for designing and developing a complete marketplace platform in English and Vietnamese that includes, at a minimum, the following functionality.

User Management

Support multiple user roles including:

- Salon Owners
- Beauty Professionals
- Platform Administrators

Features should include:

- Account registration and login
- Profile management
- Password recovery
- User verification
- License and insurance document uploads
- Identity verification capabilities

Marketplace Listings

Salon Owners will be able to:

- Create and manage listings
- Upload photos
- Describe available stations, suites, and treatment rooms
- Set pricing and availability
- Manage amenities
- Accept or decline booking requests
- View booking history

Beauty Professionals will be able to:

- Browse listings
- Search by location
- Filter by services, amenities, pricing, and availability
- View listing details
- Save favorites

Booking & Scheduling

The platform should include:

- Real-time availability
- Booking calendar
- Reservation management
- Booking confirmations
- Cancellations
- Rescheduling
- Calendar synchronization (if applicable)

Payments

Provide secure payment processing including:

- Customer payments
- Vendor payouts
- Platform service fees
- Refund processing
- Transaction history
- Digital receipts

Preferred payment providers may include Stripe or similar secure payment gateways.

Communication

Include in-app communication features such as:

- Messaging between salon owners and beauty professionals
- Booking notifications
- Email confirmations
- Push notifications
- Administrative announcements

Ratings & Reviews

Allow users to:

- Rate completed bookings
- Leave reviews
- Report inappropriate content

Administrative Portal

Develop a secure web-based administration dashboard capable of:

- User management
- Listing management
- Booking oversight
- Payment reporting
- Customer support management
- Analytics and reporting
- Content management
- System configuration

Technical Requirements

The solution should include:

- Cloud hosting
- Secure API architecture
- Scalable database
- Mobile-responsive web application
- Secure authentication
- Data encryption
- Backup and disaster recovery recommendations
- Performance optimization
- Analytics integration

The selected vendor should recommend an appropriate cloud hosting environment and architecture.

Vendor Deliverables

The selected development partner should provide:

- UI/UX design
- Native iOS application

- Native Android application
- Responsive web application
- Backend/API development
- Administrative portal
- Database design
- Quality assurance and testing
- Deployment to Apple App Store and Google Play
- Production deployment assistance
- Technical documentation
- User documentation
- Training for administrators
- Warranty period following launch
- Optional ongoing maintenance and support

Source code and intellectual property developed under this project shall become the property of The Salon Spot upon final payment.

Vendor Proposal Requirements

Interested vendors should include the following in their proposal:

- Relevant marketplace application experience
- Portfolio of similar projects
- Proposed technology stack
- Development methodology
- Estimated project timeline with milestones
- Project team structure
- Detailed cost estimate
- Third-party licensing costs (if applicable)
- Hosting recommendations and estimated annual costs
- Warranty and post-launch support options
- Ongoing maintenance pricing
- Client references
- Assumptions and exclusions

We appreciate your interest in partnering with The Salon Spot and look forward to reviewing your proposal.
